Vehicle Buyer's Order

DEALER: _____ DATE: _____
ADDRESS: _____ SOLD BY: _____
_____ STOCK # _____
PHONE: _____

Sold to: _____ Buyer's D.L#: _____
Address: _____ Buyer's D.O.B. _____
City, St., Zip: _____ Co-Buyer's DL# _____
Phone: (home) _____ (work): _____ Co-Buyer's D.O.B. _____ Phone: _____
Co-Buyer: _____ Co-Buyer's Address: _____

Year: ___ Make: _____ Model: _____ Body: _____ Color: _____ Vehi#: _____

1.	Cash Price Of Vehicle	9. Sales Tax	
2.	++Dealer Preparation	10. County Sutax	
3.	Service and Notary Fees	11. Other Non-taxable Sales	
4.	##Mechanical Service Agreement	12.**License and Registration Fees	
5.	Other Taxable Sales	13. Payoff Lien On Trade-in (line-7)	
	Gross Taxable Sales	**Total Charges, Fees, Taxes, Equity**	
		14. Deposit	
6.	Value Of Your Trade-in	15. Cash On Delivery	
7.	Less Balance Owed On Trade		
8.	Net Equity On Trade	***Unpaid balance of cash price*** *(Amount Financed)*	
	Net Taxable Sales		

TRADE VEHICLE INFORMATION

Trade-in: Yr ___ Make _____ Model _____ Body _____ Miles _____ Vehi# _____

As a part of this order I hereby sell and transfer all rights, title and interest to the above listed vehicle dealer, and I certify that I have a legal right to dispose of same and that said vehicle is free from all liens other than that specified in this order.

I have read the printed matter attached to this Buyer's Order and agree that it is a part of this agreement as if it were printed above my signature. The front and attached page of this order comprise the entire agreement pertaining to this purchase and no other agreement of any kind, verbal understanding or promise whatsoever, will be recognized. Receipt of a copy of this order is hereby acknowledged. I certify that I am 18 years of age or older.

BUYER: _____ CO-BUYER: _____

UC Davis Academic Calendar 2012–2014*

	Fall 2012	Winter 2013	Spring 2013	Fall 2013	Winter 2014	Spring 2014
Registration Guide and Registration appointment times available	May 7	Oct 29	Jan 28	May 6	Oct 28	Jan 27
Pass 1 Registration (assigned appointments)	May 14	Nov 5	Feb 4	May 13	Nov 4	Feb 3
Pass 2 Registration (assigned appointments)	Aug 27	Nov 26	Feb 25	Aug 26	Nov 18	Feb 24
Last day to: • Pay fees to avoid classes being dropped. Students with an unpaid balance will be dropped from classes • Petition for classification to resident status	Sep 15	Dec 15	Mar 15	Sep 15	Dec 15	Mar 15
Quarter begins	**Sep 24**	**Jan 4**	**Mar 28**	**Sep 23**	**Jan 3**	**Mar 27**
Instructional Startup Activities	Sep 24–26	Jan 4	Mar 28	Sep 23–25	Jan 3	Mar 27
Instruction begins • Last day to file for PELP	**Sep 27**	**Jan 7**	**Apr 1**	**Sep 26**	**Jan 6**	**Mar 31**
Last day to: • Make final fee payment of registration fees with penalty • Drop 10-day-drop courses • Change student status (part-time/full-time)	Oct 10	Jan 18	Apr 12	Oct 9	Jan 17	Apr 11
Last day to add courses	Oct 12	Jan 23	Apr 16	Oct 11	Jan 22	Apr 15
Last day to drop 20-day-drop courses	Oct 24	Feb 4	Apr 26	Oct 23	Feb 3	Apr 25
Last day to: • Opt to take courses on a P/NP or S/U basis • Change units in a variable unit course	Oct 31	Feb 11	May 3	Oct 30	Feb 10	May 2
Instruction ends	**Dec 7**	**Mar 18**	**Jun 6**	**Dec 6**	**Mar 17**	**Jun 5**
Final examinations	Dec 10–14	Mar 19–23	Jun 8, 10–13	Dec 9–13	Mar 18–22	Jun 7, 9–12
Quarter ends	**Dec 14**	**Mar 23**	**Jun 13**	**Dec 13**	**Mar 22**	**Jun 12**
Commencement	Dec 15	——	Jun 14–16	Dec 14	——	Jun 13–15
Academic and Administrative Holidays	Nov 12, Nov 22–23, Dec 24–25, Dec 31–Jan 1	Jan 21, Feb 18	Mar 29, May 27	Nov 11, Nov 28–29, Dec 24–25, Dec 31–Jan 1	Jan 20, Feb 17	Mar 28, May 26

Filing for Candidacy (Graduation)

	Fall 2012	Winter 2013	Spring 2013	Fall 2013	Winter 2014	Spring 2014
Filing period for those who expect to complete work for a bachelor's degree to file for candidacy with the Registrar †	Jun 1–Oct 10	Nov 7–Jan 18	Feb 1–Apr 12	Jun 1–Oct 9	Nov 7–Jan 17	Feb 1–Apr 11
Last day to file minor with the Dean's Office ‡	Oct 10	Jan 18	Apr 12	Oct 9	Jan 17	Apr 11

Undergraduate Admission

	Fall 2012	Winter 2013	Spring 2013	Fall 2013	Winter 2014	Spring 2014
Last day to file an application for admission scholarships	Nov 30, 2011	Jul 30, 2012	Oct 31, 2012	Nov 30, 2012	Jul 29, 2013	Oct 31, 2013
Last day to file a readmission application with the Office of the University Registrar to return to undergraduate status	Jul 31, 2012	Oct 31, 2012	Jan 31, 2013	Jul 31, 2013	Oct 31, 2013	Jan 31, 2014

Summer Sessions 2012

Jun 25–Aug 3
Aug 6–Sep 14

Summer Sessions 2013

Jun 24–Aug 2
Aug 5–Sep 13

Financial Aid Filing Period

- Priority filing period for grants, loans, work-study and California Student Aid awards for 2013–2014: Jan 1–Mar 2
- Filing period for undergraduate scholarship application for 2013–2014: Oct 1–Jan 9, 2013

Key to Symbols

- * Dates are subject to change; check the appropriate Registration Guide
- † Filing period for students graduating: • Sep 2012, is May 14–Jul 6 • Sep 2013, is May 13–Jul 5 • Sep 2014, is May 19–Jul 7
- ‡ Deadline to file a minor program with Deans Office for students graduating: • Sep 2012, is Jul 8 • Sep 2013, is Jul 1 • Sep 2014, is Jul 7

Journal of Molecular Structure. A few years ago it was possible to study new compounds of possible biological activity by new technical methods such as molecular models and docking studies [37, 86, 87, 88, 89, 90]. Advert The way to find new derivatives of colchicin, especially derived from thiocolchicin, seems to be worth trying because of its promising cytotoxicity. Journal of Natural Products. Gohar MA, Makkawi M. The antibacterial action of colchicin and colchicein. Alkylthio substitute derivatives in position C-10 have been synthesized from the cochicin 31–35(Figure 5) [47]. London, W1V0BN : The Chemical Society Burlington House; 1971. Poulev A, Bombardelli E, Ponzone C, Zenk M. Regioselective bioconversion of colchicine and thiocolchicine into their corresponding 3-demethyl derivatives. Usually a male/female of 60 kg takes a dose of 0.5-4.8 mg/day [82, 83]. In recent decades, many attempts have been made to design and synthesize new derivatives of colchicin that could be compounds less toxic and more effective than colchicin as cytotoxic agents. Some emerging dermatologic uses include the treatment of acquisite bully epidermolisis, leucocytoclastic vasculitis and aftous stomatitis. Abstr., 1994, 120, 245578.). DOI: 10.1097/MD.000000765986. 3.2. Colchicine. Its dynamic instability is controlled by many proteins and compounds such as colchicin. Colchicin and its biologically active derivatives, especially tiocolchicin and its derivatives, have been widely tested in cell lines of cancer for in vitrocytotoxicity, in mice, evaluated for inhibition of tubulin polymerization [66], in the axonal cytosceleton of the mice peroneus nerve [67]. A guide for the internists. 2-Demethyl-N-benzyldemecolceine = speciocolchine 28[35] has been prepared from 2-demethyldemecolcine. Chemical biology artnoc artnoc sodaborp y sodinetbo odis nah enicihclocoihtlytecaed-N ed socit©Âtnis sodavired ohcO .sagord ed o±ÃesiD Cell lines and 3 of them showed good activity 66, 67, 68 [52]. Iranian Journal of Pharmaceutical Research. 1,2-didemethylchochicin: a new alkaloid fromgloriosa superba. Wolach B, Gotfried M, JedEikin A.â Colchicine Análogos: effect on amyloidogenesis in a murine model in vitro, in polymorphonuclear leukocytes. Cocco G, Chu DCC, Pandolfi S. Colchicine in clinical medicine. Newâ York: Academic Press; 1952. Wildman WC, Pursey BA. In: Manske RH. London W1V0BN: The Chemical Society Burlington House; 1972. His anti-tumoral activity derives from his activity of joining tubulin [39]. Doi: 10.1371/journal.pone.015604889. Vaddeana, M. Dasgeb B, Kornreich D, McGuinn K, Okon L, Brownell I, Sackett DL.â Colchicine: an old drug with new applications. Doi: 10.1002/ardp.20050014853. Cutler SJ, Cutler HG, editors. (*The author's own photos). AdvertisementColchicine (1) is an alkaloid with an unusual structure and has the entire family of structural relationships. Passarella D, Peretto B, Blasco y Yepes R, Cappelletti G, Cartelli D, Ronchi C, Snaith J, Fontana G, Danieli B, Synthesis of Borlak J. and biological evaluation of the new thiocolchicin "Podofylotoxina conjugates. 2016; 102 (8): 590-596. Doi: 10.1021/jm0502tsubmitted: June 17, 2017 revised: November 21, 2017 Published: February 6, 2018 © 2018 The Author (s). The conjugates have blocked the cell in the G2/M phase of the cell cycle and were up to 100 times less active in the non-unit vitro drug [73]. Kim SK, Cho SM, Kim H, Seok H, Kim SO, Kwon TK, Chang Js.â The Colchicine Derivative CT20126 shows a new modulatory activity of microtubules with apoptosis. Kurdica, M. Nakagava-Gotto K, Chen C, Hamel E, Wu C-C, Bastow KF, Brossi A, Lee KH. Agents Antitumor. Bioorganic chemistry. The derivative of 3-demethyl of colchicin and 10 methylchochicin have also been obtained by regioselective bioconversion of 1 andby microorganisms of 1 by 375 and Bacillus megaterimacbt03 [41, [41, Many years of research for cochicin derivatives as good cytotoxic agents, it was established that the exchange of metoxyl substituto −OCH3 in position C-10 to the amino group (NH2, NHR1, or NR1R2) and especially methylium (CH3S -) or alquilthio increases cytotoxic activity. DOI: 10.1186/1860-5397-2-1382. In 1968, it was known that colchicin could efficiently tie the tubulin. Lennerz C, Barman M, Tantawy M, Sopher M, Whittaker P. Colchicine for primary prevention of atrial fibrillation after open heart surgery: Systematic review and metaanalysis. DOI: 10.1007/s11739-016-1496-57. 69 and 70 showed significant activity against tumor cell lines: A549, 1A9, and KB with IC50 values 0.02–0.06 µg/mL [53]. Ethers complexes of 3-demethyl-10-methyltiocolchicine 62–65 have been prepared as potential drugs [51]. 1997;53(1):111-116. DOI: 10.1002/med.261008010577. Saxton JE. 2000. PLoS One. Editor. 2016; 11 (5): E0156048 2011; 67: 7354-7 Appoints of the detection of the detection of cochicina, his activity against cancer cell lines structure: activity relationship has been established. DOI: 10.1021/jm00062a02145. The other plants of Colchicumsp. Inhibition of tubulin assembly by thiocolchicine derivatives 69and 70is IC50 8.7Â ÂÂ¼ÂM and IC50 3.8Â ÂÂ¼ÂM, respectively [53]. New England Journal of Medicine. 2002;62(15):7247-725380. Muscle spasm is one of the main factors responsible for chronic pain, and because this particular drug reduces muscle tone, it is used in therapy for the treatment of contractures and inflammatory conditions that affect the muscular system [48].AdvertisementA new tool for searching new potent anticancer agents is docking studies. The Alkaloids. Usually starting with colchicine 1hundreds of semi-synthetic and synthetic colchicine derivatives have been synthesized [28, 29, 30].Naturally occurring colchicine derivatives (color version available on the online version).Natural, seminatural and synthetic colchicines (chosen examples).Starting compound was 1,2-O-didemethylcolchicine 16converted into 1,2,3-O-tridemethylcolchiceine 17[28, 29, 30], 1,2,3-O-tridemethyl-N-deacetylcolchiceine 18[28, 29, 30], 1,2,3-O-tridemethyl-N-deacetyl-N-trifluoroacetylcolchiceine 19[28, 29, 30], and 1,2,3-O-tridemethyl-N-deacetyl-N-formyl(2,4,6-trihydroxyphenyl)colchiceine 20[28, 29, 30]. sobolifera, M. In naturally occurring (¢ÃÂÂ)-aR,7S-colchicine, the two rings (A and C) are oriented in a clockwise manner [15].AdvertisementMany naturally occurring colchicine alkaloids (some of them are listed in FiguresÂ Â3 and 4) have been converted into semi-synthetic compounds and have been prepared as potential antitumor agents. 2005;37:122-126. SuÃÂowska A, MaciÃÂÃ¼Âek-Jurczyk M, Bojko B, RÃ³Ãwnicka J, Zubik-SkupieÃÂ I, Temba E, Pentak D, SuÃÂkowski WW.Â ÂCompetitive binding of phenylbutazone and colchicine to serum albumin in multidrug therapy: A spectroscopic study. Raspaglio G, Ferlini C, Mozzetti S, Prislei S, Gallo D, Das N, Scambia - What? A new class of topoisomerase-I inhibitors. This compound is registered in different countries under the commercial names of Colcamyl, Coltramyl, Coltrax, Miorel and Musco-Ril. byzantinum, C. DOI: 10.1016/j.ijbiomac.2005.09.00765. Recent research results with colchicine and phytostigmina. DOI: 10.1111/cbdd.1261688. Biologically active natural products, pharmacists. DOI: 10.1021/bi100159p66. DOI: 10.3987/COM-93-647829. Biochemical Pharmacology. The anti-government action of the colchicin could be explained by its powerful spindle toxicity [2, 3]. The interaction between colchicin and membrane results with significant alterations of both the properties of the lipid membrane and alkaloids [39]. Dewar MJS. Cochicin structure. Many new derivatives have been obtained, have been tested for many different lines of cancer cells, and many of them seem to be promising anticancer agents in the future. Scientists continue to design and synthesize more and more derivatives of the cochicina to look for an almost ideal anticancer agent. London W1V0BN: The Chemical Society Burlington House; 1973. 2010;24(2):152-159. Agarwal SK, Vallurupalli S, Uretsky BF, Hakeem A. Colchicin effectiveness for the prevention of recurrent pericarditis and post-pericardiotomy syndrome: An updated meta-analysis of randomized clinical data. Plants produce and store many organic compounds such as amino acids, proteins, carbohydrates, fats and alkaloids, which are usually treated as secondary metabolites. In addition, its effectiveness against melanoma and prostatic cancer has been established. Thiocolchicoside (=glucopyranosyl derivative of the semi-synthetic 3-O-demethylthiocolchicine 41), is well known as a muscle relaxing agent and as an anti-inflammatory drug substance [85]. Synthesis and biological assessment of new analogs of theand N-(benzyl replaced) deacetylthiocolchicines as a potent anti-mythitotic cytotoxic and anti-mythitotic. . . . #### ###5, 3-Demiles, 58, N-Informyl-N-Demelconcy 9[19], N-Demetigin 10, N-Demeticine 11 and Cochiceâna 12.
